

Carpe Heat Transfer Private Limited

Your Partners in Heat Transfer and Heat Exchanger Technology

An ISO 9001 : 2008 Certified Company

Carpe's Pressure Vessels

CARPE does designing, engineering and quality manufacturing of various types of pressure vessels custom made for a wide range of applications. Our product range includes air receivers, surge tanks, accumulators, blow down tanks, flash tanks, expansion tanks, filter vessel, distillation columns, hot water generators, hydro pneumatic tanks, nitrogen storage tanks, LP heater assembly, propane tanks, propane dispenser tanks, pressure vessels, refrigeration vessels, horizontal ammonia receivers, vertical ammonia receivers, oil pots, scrubbers, separators and many more.

Our Highly qualified engineers and draftsmen are not only masters of advanced technology; they also have the real-world expertise to apply it for maximum effectiveness. Carpe uses state-of-the-art CAD software packages to transpose your requirements into a cost-effective design.

With adherence and conformance to national and international codes of design and fabrication, our equipments are supplied for on-shore as well as off-shore applications.

We have been accredited with ASME, "U", "U2" and "R" stamp along with NB registration for manufacturing of pressure vessels. We are also an IBR, PD 5500, TEMA approved workshop for manufacturing of boiler ancillary equipments and Pressure Vessels.

CARPE's manufactures Pressure Vessels required for a wide range of applications to different industries like:

- Oil & Gas
- Steel
- Petrochemicals
- Refineries
- Water Treatment Plants
- Refrigeration Plants
- Chemical Industries
- Sugar & Cement Industry

The Steel is purchased direct from renowned manufacturers all over India with the best competitive rates. For small quantities and quicker deliveries we also purchase steel from our reliable and well established traders and stockiest, who can deliver plates of approved and recognised steel manufacturers, in wide range of thickness with a minimum lead time.
